## CWA Council Capacity Support, OWEB Biennial Grant 2015-17 - \$110,275

The purpose of the OWEB Council Capacity grant is to provide operating capacity support for the Coquille Watershed Association. The Coquille watershed contains 500 miles of habitat for winter steelhead and the Oregon Plan identifies 211.5 miles as priority stream reaches for Coho Salmon and fall and spring Chinook Salmon. Over the past year, the CWA has supported the development and implementation of 18 projects that address salmon and steelhead habitats. The grant also allows for Operating Expenses, along with a portion of the Director's salary, and covers critical expenses including yearly tax filing, payroll reporting, business licensing, insurance, rent, office supplies and utilities.
